

AI-POWERED SUPPORT PLATFORM

Customer Support Ticket System

A full-stack ticketing platform where AI attempts every resolution first.

ML Classification

AI-First Triage

Real-Time Updates

PROOF-OF-CONCEPT

THE PROBLEM

Every Ticket Still Waits on a Human

A password-reset request waits in the same queue as a critical outage.

Every Ticket Waits on a Human

Simple, repetitive requests sit in the exact same queue as critical issues.

Triage Is Manual and Inconsistent

Someone reads, categorizes, and prioritizes every ticket by hand first.

SLA Breaches Surface Too Late

Response-time commitments are noticed after the fact, not before.

Past Fixes Are Forgotten

Agents re-solve problems from scratch with no searchable history.

THE SOLUTION

AI That Actually Resolves Tickets

A full-stack ticketing platform where AI is load-bearing, not bolted on.

ML Classifier

TF-IDF + Logistic Regression, trained in-house. Predicts category & priority the instant a ticket is created — in-process, zero network calls.

Gemini AI Agent

Chats with the customer directly and attempts a genuine resolution — a human only steps in when the AI can't help.

Auto SLA Clocks

Per-priority response & resolution timers

Smart Assignment

Routed by workload + availability

Similar-Ticket Memory

RAG over resolved tickets (pgvector)

Live Updates

WebSockets — no manual refresh

FastAPI · PostgreSQL + pgvector · React · Google Gemini · WebSockets

From Ticket to Resolution

KEY BENEFITS

Why It Matters

Faster Resolution

Simple issues get solved immediately by AI — no queue, no wait for a free agent.

Lighter Agent Workload

Agents only see tickets that truly need a human — hard problems and edge cases.

Consistent Triage

Every ticket gets the same instant, unbiased category and priority call.

Nothing Slips Silently

Per-priority SLA clocks surface at-risk tickets before they breach, not after.

Institutional Memory

Every resolved ticket becomes searchable context — for the AI and for agents.

Full Transparency

AI's original guess, every reply, and every escalation reason stay on the record.
